

HONEYWELL MANUFACTURING SOLUTIONS

As manufacturers face increasing pressure to do more with less, they are searching for ways to help them strike a balance between their digital transformation goals and their financial health. Honeywell develops innovative solutions that help manufacturers achieve their digital transformation goals, harness the power of data and enhance workflows throughout the supply chain, helping them sustain highly efficient and productive manufacturing operations.

Intelligent **printers** are your trusted allies.

With so many workflows happening simultaneously to meet increased customer demand, manufacturers need their print operations to be reliable and worry free. Honeywell printers are designed to be seamlessly integrated into existing networks with minimal downtime and offer highly precise and efficient performance. With a variety of print solutions - including desktop, mobile and industrial - manufacturers can minimize their printing woes with Honeywell print solutions.

Mobile Computers ready for the toughest manufacturing environments.

When deploying a mobile computing solution throughout your manufacturing operations, you want the solution to be a source of strength, not vulnerability. Honeywell mobile computers are designed to be rugged enough to endure the manufacturing floor, while offering the agility and flexibility of a consumer mobile device. With the Mobility Edge™ platform, manufacturers can double-down on their future by deploying a durable, stable and secure platform upon which they can build the future of their mobile computing operations and lower their total cost of ownership.

Maximize asset uptime with **Operational Intelligence**.

With so much data inundating manufacturers today, it can be overwhelming trying to make sense of it all. In a world where staying competitive means doing more with less, businesses need their data to work for them, not the other way around. Honeywell Operational Intelligence software empowers manufacturers to make confident decisions with predictive analytics and real-time data capturing, enhancing their ability to make impactful workflow optimizations.

Ultra-reliable industrial and wearable **scanners**.

In order to combat challenges presented by growing eCommerce demand and supply chain issues, staying on time and on schedule is vital for today's manufacturers. With Honeywell rugged, industrial handheld and wearable scanning solutions, manufacturers know they are deploying a resilient solution that is ideal for fast paced, high volume scanning operations. With durable waterproof and dust-proof housing, Honeywell scanners can endure harsh work environments and help enable your workers to operate at their peak performance and reduce total cost of ownership.
